Grande Extends CloverLeaf Digital's Interactive TV Portal

Grande Communications® Signs 3-Year Extension for CloverLeaf's Interactive TV Service

Brooklyn, NY, December 11, 2007 – CloverLeaf Digital LLC, a leading provider of interactive television applications and services, announced today that Grande Communications, a competitive broadband service provider in Texas, has signed a multi-year extension for Grande Interactive TV – a custom version of CloverLeaf's localized news and information walled garden interactive TV service.

Distributed by Grande to digital cable subscribers in seven Texas cities, Grande Interactive TV includes news and sports coverage from Associated Press, local weather from AccuWeather, local entertainment guides, horoscopes and a local community events calendar published by community organizations with CloverLeaf's DashDaily community publishing tools. Grande Interactive TV is notable for the integration of an extensive offering of video clips, including movie trailers and news clips from Associated Press and Odessa CBS affiliate KOSA.

Successfully offering digital cable in some of the most competitive markets in the country, Grande Communications has long understood the competitive value of interactive TV services. "CloverLeaf has provided Grande with a key element of our digital cable offering since launching Grande Interactive TV," said Chad Jones, chief service officer, Grande Communications. "They have been a great partner, and we look forward to launching new interactive services with them as we continually differentiate our video offerings by increasing the value that we provide our customers."

"Grande was one of CloverLeaf's very first affiliates," said CloverLeaf Founder and Managing Partner, Lawrence Brickman. "As we enter our fifth year in business, our early contracts are coming to a conclusion, and although they say imitation is the greatest form of flattery, we consider it the greatest testament of the value of our services when our customers renew their contracts with long-term agreements."

About CloverLeaf Digital LLC (www.cloverleafdigital.com)

CloverLeaf Digital is the leading independent provider of interactive TV walled garden portal services in the United States. Distributed in over 150 cities, CloverLeaf's interactive network provides telephone companies, cable operators, and other distributors of digital video with the ability to offer on-demand localized news and information to their subscribers. CloverLeaf's turnkey offering is optimized for the underlying TV platform, customized to meet the operator's requirements, and localized for the communities in which it is distributed.

About Grande Communications (www.grandecom.com)

Headquartered in San Marcos, Grande Communications is building a deep-fiber broadband network to homes and businesses from the ground up. Grande delivers high-speed Internet, local and long-distance telephone and digital cable over its own advanced network to communities in Texas. Grande's bundled service area includes portions of Austin, Corpus Christi, suburban northwest Dallas, Midland, Odessa, San Antonio, San Marcos and Waco. Grande also leverages its telephone and data infrastructure by serving enterprises and communications carriers nationwide with broadband transport services and network services. Grande's voice network terminates traffic worldwide, offering both traditional and IP-based services; its managed modem network provides coverage nationwide; and its private line and metropolitan networks provide optical services in Texas and surrounding states. Grande's 3,100-fiber-mile network incorporates SONET-based technology for protection, diversity and optimal performance.
